COMMUNITY NEWS

Newsom calls for big boost in funding for California's film and TV tax credit, throwing Hollywood a lifeline Gov. Gavin Newsom unveiled a proposal Sunday to more than double the annual amount of money allocated to California's film and TV tax credit program as Hollywood struggles to compete with other production hubs.

The governor declared his intent to expand the annual tax credit to \$750 million, up from its current total of \$350 million, which would make California the top state for capped film incentive programs, surpassing even New York. If approved by the Legislature, the increase could take effect as early as July 2025 and span five years.

The announcement comes as Newsom and other elected officials have been under increasing pressure to act as Hollywood has struggled to rebound since the pandemic and last year's dual strikes by writers and actors

DIABETES AWARENESS MONTH

WHAT IS DIABETES?

Diabetes is one of the leading causes of disability and death in the United States. It can cause blindness, nerve damage, kidney disease and other serious health problems. Diabetes is a disease that causes high blood glucose or sugar and limits the body's ability to make enough insulin. insulin is needed to move the sugar but when the body can't make enough insulin or uses the insulin the right way, sugar builds up in the blood. This can cause harm to your eyes, kidneys, and nervous system.

COMMON RISK FACTORS

There are some risk factors that we can't control, like a family history of diabetes. But other factors that put you at high risk for type 2 diabetes, including smoking or being overweight, are ones you can try to work on. Lifestyle changes like increasing physical activity, losing weight and eating healthy can make a difference.

High Blood Pressure Your heart has to work harder when blood pressure is high. Your risk for heart disease, stroke and other issues

<u>High</u> Blood Glucose

High blood glucose levels (hyperglycemia) can lead to being diagnosed with prediabetes or diabetes. Being Overweight Being overweight increases your risk of type 2 diabetes, heart disease, stroke, high blood pressure, unhealthy cholesterol levels & high blood sugar <u>Smoking</u>

10H

Smoking hurts your lungs & heart by lowering the amount of oxygen that reaches your organs. It raises cholesterol levels & blood pressure thus increasing your risk of heart attack or stroke

BIG SUNDAY

goes up.

WHO IS BIG SUNDAY?

We organize over 2000 ways for you to get involved every year – from working on service projects at our headquarters to helping us collect materials for food, book, and school supply drives, to joining us for school beautification projects, and much more!

WHO IS WELCOME TO BIG SUNDAY?

We have participants of all ages, backgrounds and abilities. They come from all kinds of different neighborhoods, and we do work in all kinds of different neighborhoods, too. People take part in Big Sunday projects through schools, faith groups, businesses, clubs, as families and as individuals.
